

## Simple Guidelines To Prepare For The AWS Arch Associate Exam:

Here is some information on Route53 a service we didn't have as much time to touch on:

<https://docs.aws.amazon.com/Route53/latest/DeveloperGuide/Tutorials.html>

<https://docs.aws.amazon.com/AmazonS3/latest/dev/website-hosting-custom-domain-walkthrough.html>

<https://www.youtube.com/watch?v=gSTwWv-bH1g>

With regards, to the test itself here are a few things:

Preparing for the AWS Associate Arch Exam

These github pages do a great job detailing how to prepare

<https://gist.github.com/leonardofed/bbf6459ad154ad5215d354f3825435dc>

<https://gist.github.com/miglen/797fd38d0e26b9f68a1f>

I would add the following concepts should be focused on:

VPC, Nat Gateways, Bastion Hosts and all of the services around networking. Read the Amazon guides on vpc and all of the networking services.

Learn the non cloud way of doing things ie what is a network for, what is an ip address/CIDR block, how are networks configured etc..

learn some non cloud concepts here:

[https://mva.microsoft.com/en-US/training-courses/networking-fundamentals-8249?l=zcmNgKKy\\_1704984382](https://mva.microsoft.com/en-US/training-courses/networking-fundamentals-8249?l=zcmNgKKy_1704984382)

[https://mva.microsoft.com/en-US/training-courses/understanding-active-directory-8233?l=aErw3QJy\\_6904984382](https://mva.microsoft.com/en-US/training-courses/understanding-active-directory-8233?l=aErw3QJy_6904984382)

<https://mva.microsoft.com/training-topics/identity-and-access-management#!index=2&lang=1033>

[https://mva.microsoft.com/en-US/training-courses/windows-server-administration-fundamentals-8477?l=LaRRb\\_eXz\\_5004984382](https://mva.microsoft.com/en-US/training-courses/windows-server-administration-fundamentals-8477?l=LaRRb_eXz_5004984382)

These AWS Whitepapers and videos are also good

[https://d0.awsstatic.com/whitepapers/AWS\\_Cloud\\_Best\\_Practices.pdf](https://d0.awsstatic.com/whitepapers/AWS_Cloud_Best_Practices.pdf)

[https://www.youtube.com/watch?v=zU1x5SfKEzs&list=PL63J1r2PBvog0xRPkW4zL6ou9XD\\_uFGu](https://www.youtube.com/watch?v=zU1x5SfKEzs&list=PL63J1r2PBvog0xRPkW4zL6ou9XD_uFGu)

Once you get the non cloud concepts down it's just a matter of learning the aws counterparts. The uses cases are pretty much the same.

Also our on demand video library has many tutorials that show the end to end process for many of the use cases of the services and how to use the services to build solutions visit [www.itjobhacks.com](http://www.itjobhacks.com)

Then try some practice exams at [cloudacademy.com](http://cloudacademy.com) and spring for the AWS practice exam about a week before you sit for the test if possible.
